

# WALOTAPE

More than just an easy opener

# INNOVATIVE TAPES FOR PRODUCT PRESENTATION AND CONVENIENCE

Tear tapes really are the key to the product. They differentiate products, they protect against brand piracy and they can increase the merchandise appeal. Thanks to flexible stock-keeping and reduced overall packaging costs, these universal openers are an important part of intelligent marketing programs.

## Increased safety

- ▶ Holograms
- ▶ Micro-lettering
- ▶ Heat- and light-sensitive features

Candy boxes, cookie packages, packs of cigarettes, blank CDs, tea bags or hygienic articles – the market is multifaceted and our solutions are just as customized. Being one of the leading manufacturers of high-quality packaging films, we are the ideal development partner who can quickly turn ideas into market reality. It is up to you to define the direction before we come in to set the course. The result will be tear tapes which are customized exactly to the requirement profile, which provide attractive added value and which efficiently support the processing.

Wipak offers a broad range of tear tapes for different film types, package designs and applications. Customized versions are available on request to complement the standard range.

## Product range

### Walotape PPL SK

Longitudinally oriented polypropylene with self-adhesive

### Walotape PS

Polyester with sealing wax

### Walotape Combi MS

Composite film of coated cellophane laminated with biaxially oriented polypropylene with sealing wax

### Walotape Combi P

Composite film of polyester and polyethylene

## TEAR TAPES FOR ANY APPLICATION

### Standard product range

Various common tape widths and colors (transparent, red, gold and center line in gold) are available on stock as standard products.

Carrier materials, sealing media and dimensions of Walotape are adapted to all commonly used packaging machines. They are particularly suited for wraparound packs in food and non-food applications. This includes special applications such as cheese wedges in aluminum films and special tapes for packaging manufacturers and processors.

Wipak's openers meet all food-law requirements. The selection of the suitable tear tape mainly depends on the functionality and the properties of the film as well as on the possibilities of the packaging machine. Your technical specifications will be addressed.

### Widths and running lengths

- ▶ 1.6 mm to 15.0 mm
- ▶ 6,000 m to 150,000 m (depending on coil/width)

### Available forms

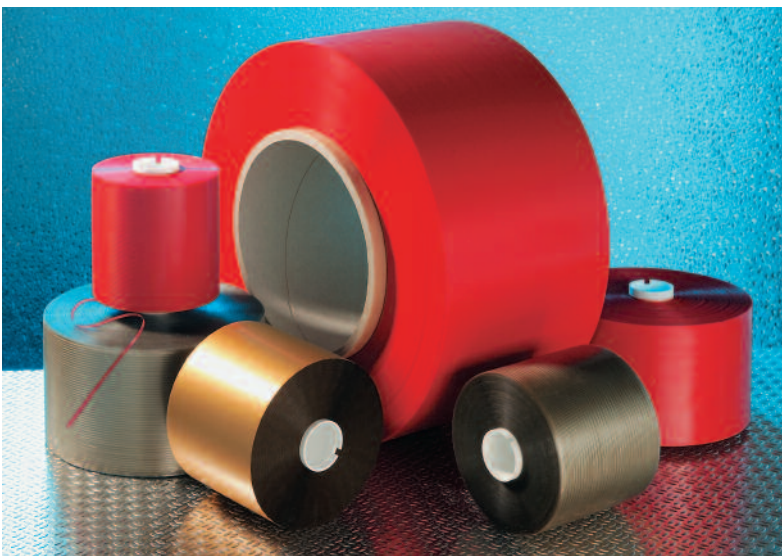

- ▶ Coils with washer disk, Core: 30 mm
- ▶ Coils with washer disk, Core: 29 mm
- ▶ Jumbo coils, core: 152 mm
- ▶ Rolls for lateral cut, Core: 76 or 152 mm

### Features

Walotape tear tapes can be applied by means of heat and/or pressure. Optional versions: Pressure adhesion using self-adhesive substance, adhesion by means of sealing wax with or without adhesive feature.

### Pressure

The tapes are either transparent or they can be printed using any printing image – e.g. a thin center line – using up to ten colors.
